

Introduction to ACMOS

The ACMOS Method

A New Paradigm in Medicine and Health

Topics

- *What is the ACMOS Method?*
- *Medical applications*
- *ACMOS Instrumentation*

An Innovative Approach to a Healthier Tomorrow

ACMOS Method

Part of the most advanced 21st century medical systems

Combines the wisdom of:

- ❖ Ancient Chinese Medicine
- ❖ Scientific Discoveries of Modern Molecular Biology and Quantum Physics

Influence of Chinese traditional medicine as well as decades of research in biophysics and bioenergetics culminated in 1986 with creation of **ACMOS**

“**A**nalysis of the **C**ompatibility of **M**atter on the **O**rganism and its **S**ynergy”

A-C-M-O-S

- ❖ Aim of ACMOS is to reestablish the energetic qualities of the body and restore its proper self-organization and adaptation ability
- ❖ Achieve energetic balance known as “perfect health”

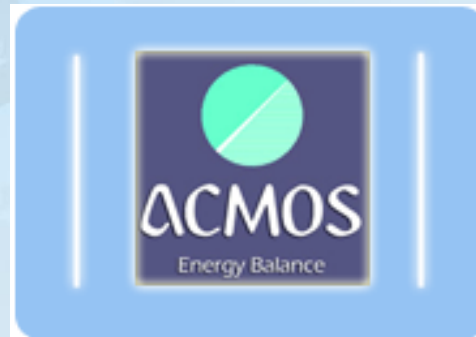

ACMOS Method

Dr. Rene Naccachian

- Doctor of molecular biology (PhD)
- Doctor of traditional Chinese medicine

Researched the energy of the human body and the environment for more than *two decades*

- State-of-art research into biophysics and bioenergetics allowed him to develop a range of *high-tech, non-invasive, non-traumatic instruments and natural products*
- *Designed to regulate the level of body and mind disorders*

ACMOS Method

Particular Approach

- Differs considerably from orthodox Chinese acupuncture
- Reasoning is not based on a philosophical basis, but on very exact down to earth measurements
 - Offers quick ways to identify energy blockages
 - Indicates how to solve them with lasting results

Objective

ACMOS technique aims to reach the deepest origin of the chain of disorders to achieve global balance durably

ACMOS Method

Human being (energetic aspect) is an extraordinary transmitter / receiver of fantastic quality

❖ superior to anything (machine / instrument) man made

ACMOS resonance techniques utilize this extraordinary faculty

- Obtains precise information from energetic body
- Information on the physical and mental disorders which the material body is experiencing
- Using principles of quantum physics, all pertinent info about internal and external aggressions which culminate in various disorders are registered by the energetic body

ACMOS Method

All radiating information (scanners, x-rays, biological and chemical analysis) concerns the symptomatic (centrifugal) information

e.g. Blood analysis expresses abnormalities, which are only consequences of deep energetic disorders

Orthodox Medicine

- Attempts to ***control imbalances by prescribing daily treatments*** until the analyses of these problems are satisfactory
 - This is a correction of the manifestation of the problem, but ***does not regulate the cause of it***
-

ACMOS Method

- Allows organization of the ***human being in his global aspect*** (not as bits & pieces)
- Manages energies – Yin (representing our energy resources) and Yang (centrifugal radiation) energies
 - Alternative methods include Vega, Mora, Voll, kinesiology, pulse-Nogier, etc. capable of managing only yang energy – ACMOS detects and restores both

ACMOS Method

Every living cell in our body directs its luminous rays towards the general center of energy

- Inner polarity situated in the chest

This center, by centrifugal action, sends its light into the cells that are dying (low quality) to revitalize them

Proper functioning of the organism is therefore dependant on 2 forces:

❖ Yin Centripetal Energy

❖ Yang Centrifugal Energy

- When light of a cell is no longer convergent = cell withering or energy line blocked
- Vibratory energy center (through it's centrifugal action) triggers a pressure on the cells to revitalize them during life cycle / ejects them at end of life

ACMOS Method

- Additionally, their “light” (biophotons – Dr. Popp) will be ejected into the environment / matter will be removed through the lymphatic circuits

All problems of illness, all physical and psychological disorders
Start from these cells that are in lower energy quality

The more the body is cluttered with weak non-evacuated cells

More problems body will face

ACMOS Method

Aim of ACMOS

Restore the Profound Capacities of the Human Being by Acting Upon its Centripetal and Centrifugal Energies

- ❖ The method is oriented towards the organization of the network of *information entering and leaving the body* after having left its impact
- ❖ When body no longer capable of intercepting + treating the information necessary for perfect functioning, *disorders materialize in the physical and mental dimension* (after having deranged the energetic dimension for some time)

ACMOS Method

Example

If a body is submitted to multiple aggressions of life – becomes overwhelmed

- cannot insure proper eliminations of its cellular toxins
- non-evacuated cellular toxins will be deposited in weakest flow zones
 - **causes energy blockages**

❖ *ACMOS Method* identifies and balances this energetic dysfunction

❖ Method permits optimal management of physical and mental dysfunctions

ACMOS Method

Understanding the ACMOS Method

First important to analyze its analogies and its differences from traditional Chinese medicine (acupuncture system) or the art of managing the global balance via energy points and circuits

Traditional Chinese Medicine

- Person's health is a result of the balance of 2 opposing forces known as yin and yang

Man is governed by *3 types of energy*:

- ❖ **Ancestral Energy** – includes all characteristics which we inherit from our species and our forefathers
- ❖ **Nourishing Energy** – resulting from our food and respiration; in charge of nourishing our organs and support their functions
- ❖ **Defensive Energy** – manages and controls the mechanisms which adapt man to his environment

ACMOS Method

Understanding the ACMOS Method

Yin and yang energies never stop, they are in constant movement regulated by internal dynamics:

- ❖ Dynamics of complementary elements (male / female)
- ❖ Dynamics of alternating elements (day / night)
- ❖ Dynamics of energy transfer (yang energy to yin / vice versa)

Physics – principle of antagonism and complementation is perfectly illustrated by phenomenon of light as an electromagnetic wave and quanta particles

- Climactic conditions – yin / yang explains alternative seasons
- Hot Summer (yang) to Cold Winter (yin)
- Spring is yang in the yin / Fall is yin in the yang

ACMOS Method

Yin / Yang in Medicine

Demonstrated as opposite actions

- ❖ Sympathetic / Parasympathetic Systems
- ❖ Poisons / Anti-poisons
- ❖ Stimulating / Inhibiting Substances

At conception, from the moment sperm encounters ovum, the first cell is constructed around a “spark of light” which is the perfection in all of us

-“Vibrating Light” shines much further out than the cell, creating a first “vibratory” field which is perfectly symmetrical to the central axis of the cell

- 2 other fields equally radiate around the cell – **Magnetic Field** of Earth / Electric, **Cosmic Field**

- reflect the energetic state of the cell in its “matter” state

- cell divides into 2 identical cells with 3 perfectly symmetrical fields / 2 cells divide into 4 perfectly identical cells till the complete constitution of body

ACMOS Method

ACMOS Method uses this perfect symmetry of the energy fields

-measured with ACMOS lecher instrument

- identifies any energetic imbalances of the body at its various levels
- Under pressure of the cosmic force + control of the telluric channel, the vibration center will radiate energy through declining cells to revitalize them and when necessary eliminate them from the body

3 Energetic Fields Measured:

- ❖ **Vibratory Field** – co-responds to power of our energy after the vitalization of cellular system. This field radiates around the body ranging from a few meters to infinity. It is measured with a lecher instrument scale at 2.5
- ❖ **Centripetal Energy Field (Yin)** – reflects our capacity to constitute our centripetal energy forces to best manage material body. No other instruments can identify blockages of such levels of the body's energy (no radiation is registered outside body). It is measured with a lecher instrument at 5.7
- ❖ **Centrifugal Energy Field (Yang)** – manages our material cellular system and provides energy to weak cells. It is measure with a lecher instrument at 7.8

ACMOS Method

Symmetry of Cellular Energy Creates the Global Energetic Balance

- When symmetry is not present (check by ACMOS lecher instrument) there is poor organization of body energy and its functions

Body is permanently managing its functions by activating and deactivating its command points (acupuncture points)

- Very organized manner
 - Body voluntarily and intelligently blocks some points to manage problems
-

Body = total sum of its cells and should maintain its symmetry and balance under any circumstance

❖ Will do anything that is in its capacity to control its self-energetic management

ACMOS method will manage and correct the command points

- *body alone unable to reactivate (overwhelmed)*

Energy Balancing

Energy / Mind / Body

Closely related in managing our mental and physical health

Brain is just another organ (much more intricate than other organs)

- ❖ Compared to a computer in the hands of energy
- ❖ Thoughts and emotions are result of complex electrochemical and energetic interactions within and between nerve cells (connecting Cosmic Channel of all cell) and the rest of the body

Brain-computer synchronizes and organizes relation between:

- **Intelligence** (body energy)

&

- **Body** (matter, including brain)

Mind-Body Connection

Not only is mind like rest of body

- Well-being of one is intimately intertwined with that of the other
- They share the same systems
 - Nervous
 - Circulatory
 - Endocrine
 - Immune

Disorders of the brain can send out biochemical signals and cause disorders of various systems (particularly in the blood)

- **ACMOS concept** – blood cells connect the telluric channel and collect cellular information from all cells

Mind-Body Connection

More and more scientists recognize mental states and physical well-being are *intimately connected*

Unhealthy Body

- Lead to an unhealthy mind
 - Illness of the mind can trigger or worsen diseases in the body

Everyday experience makes it clear that brain chemistry governs more than just emotions

-When your mind feels terror

- Surge of adrenaline makes stomach churn, brings up blood pressure, etc.

Neurotransmitters

Effect of mind on body more direct with the 60 or so chemicals known as **neurotransmitters**

Serotonin - Circulates everywhere (not just brain)

Depression a systematic disorder and many of neurotransmitters affect not only brain / cerebral function, but have profound affect throughout the body

When energy of body (fed off cellular information by blood cells) identifies a region representing a danger to well being of body and mind global organization, it breaks the communication with the troubled region whether it is an organ, a gland, a region or even a function or system

- The area / region is therefore cut from the main energetic communication and plugs into energy of neighboring elements

Energetic Capacity

We know – body has extraordinary sophisticated self-management controls to fight against the aggressions which create illness

- *Ability exists due to diffusing of energetic body in each of our cells to vitalize or eliminate them when they become a burden to the vitality of body*

Human body incredibly complex

- Capacity of information and self-regulation is one of its most subtle characteristics
- Interactions between body matter and energetic body therefore essential element in abilities of self-management

Any incoherence within interactions expresses itself by break of symmetry within energetic fields:

- A break of symmetry in the centripetal field shows blockages in physical & mental resources
- A break of symmetry within the centrifugal field indicates blockages in the energy circulation and loss of control in self-management of body matter and brain functions

ACMOS Method

- **Environmental Tensions may upset human balance**
- **Electromagnetic pollution can be pathogenic**
- Human cells exposed to EM pollution start protecting themselves against electric pollution and results are energetic blockages affecting proper function of the body and symptoms of fatigue, headache, nausea, etc.

Aim of ACMOS

Re-establish the energetic qualities which the body has inhibited causing it to become unable to face its daily self-organization

ACMOS Method

The major causes of incapacity are:

- ❖ Excessive internal tensions caused by mental, emotional and physical problems
- ❖ Seasonal tensions
- ❖ Environmental pathogenic aggressions
- ❖ Incompatible of medical treatment with the disorder or bad dosage and time application

The preventive actions of the ACMOS method are

- ❖ The global balance is the basis to enhance capacity to manage internal tensions
- ❖ The identifications of seasonal regulators enables resistance to adverse seasonal tensions
- ❖ The identification and location of environmental pollution to avoid or neutralize it
- ❖ The ACMOS method gives to practitioners ways and means to personalize the treatment and to better target the lesion with the right quantity of medication and exact time of application

ACMOS Method

Energetic blockage is an accumulation of dead or degenerated cells that the body cannot eliminate, **ACMOS Method restores full vital energy flow in the whole body**

When the organism is able and capable of mastering its vitality management

- energy symmetry is preserved at various organization levels
- confirmed by Lecher instrument measurements

When body is overstrained

- begins to block or slow the surface energy flow to give priority to the deep level energy flow requirements

❖ *ACMOS techniques will show at which level the energy flow is disturbed and way to restore balance and energy symmetry*

ACMOS Method

Human being is energetic entity which receives and emits vibration waves

Waves produce electro-magnetic and thermal fields (according to physics)

3 fields are scientifically identifiable and measurable by ACMOS Method:

- 1. Symptomatic centrifugal radiating field** (closest to body) – reflects the emergent surface problems and the state of the immediate defense organization
- 2. Resources centripetal convergence field** – corresponds to profound quality organization integrating inborn and acquired tensions
- 3. Vibratory resultant energy field** – expresses the effective vital radiance through our cellular system and our capacity to manage our cellular regeneration

Energy Fields

3 fields are therefore reflection of energy circulation in our organism at different levels taking into consideration all factors of interference:

- ❖ Chromosomal
- ❖ Genetic
- ❖ Defense System
- ❖ Environmental
- ❖ Ethnic
- ❖ Psychological
- ❖ Etc.

ACMOS Method

Main Goal

Resides in the fact that we are simply going to help the organism restore its coherence wherever it has lost control and ability to solve the problem.

Different Uses

- ❖ ACMOS Method can be used to analyze compatibility of the organism with food, vitamins, medication, environment, and anything that the body is in contact with.
- ❖ No limit to the evaluation using the main principle of our universe – the resonance principle in which the lecher instrument utilizes

ACMOS Valise

ACMOS Instruments

- 1. ACMOS Lecher Antenna (ALA)**
- 2. ACMOS 7 Bioenergetic Feedback Tester**
- 3. Acmodermil Stimulator**
- 4. Quantacmos Light Stimulator**
- 5. ACMOS Valise**

ACMOS Lecher Antenna

When 2 energy systems (observer and observed) are in resonance, **information exchange occurs**

- Afterwards both do not return to their original state
- Keep part of the information, which changes both energy systems and keeps them connected forever

Very much like what has been observed in quantum physics

Lecher Antenna is now the main instrument used for the qualitative detection of energy interaction among European practitioners

ACMOS Lecher Antenna

Ernst Lecher (1856-1926)

Austrian physicist / *Head of First Institute of Physics* in Vienna

Remembered for developing an apparatus

-“Lecher Lines” – used to measure the wavelength and frequency of electromagnetic waves

Ernst-Lecher-Institute

Radar research establishment set up in the 1940's in Reichenau (South of Vienna) which is now known as the ***Max Plank Institute***

ACMOS Lecher Antenna

We are using the **ACMOS Lecher Antenna**

- Many different instruments on the market: Schneider, H3, etc.

Lecher Instrument possesses some features making it ideal for measuring human body fields and its imbalances

- ❖ **Analyze energetic qualities:** animals, plants, food, medications, remedies, nutrients, and any other object or materials
- ❖ **Extremely useful in** architecture, hydrology, geology, mining and almost any other practical field of science

Features of ACMOS Lecher Instrument are:

- ❖ **It can be folded**
- ❖ **It is adaptable for self body measurements**
- ❖ **It has very high vibratory quality**
- ❖ **It can check any vibratory tensions in objects**

ACMOS Lecher Antenna

The ALA has a scale of the main vibrational frequencies relevant to humans, plants and animals

Measurements are made in “actu” (ACMOS cosmo-telluric units) equivalent to nanometers

The difference between ALA and dowsing instrument:

- Dowsing is a special gift to certain people and is dependent on mental projection
- ALA is operable by all humans and is based on scientific physical laws

ACMOS Lecher Antenna

ACMOS Lecher Instrument has an incredible wide range of use, it has become known as

“Science’s best kept Secret”

“The more quantum mechanics become within reach of the common man, the more the ALA will be understood as being a tool of revelation of our inner self and the key to the future medical science and environmental analysis.”

- Rene Naccachian

Product - Energetic Analysis

- **Negative (toxic) product**
 - No response to 2.5
- **Sedative Yin product**
 - Response to 2.5
 - Response to 8.0
 - No response to 12, 15.3
- **Stimulating Yang product**
 - Response to 2.5
 - Response to 12
 - No response to 8, 15.3
- **Balancing product**
 - Response to 2.5
 - Response to 8, 12
 - No response to 15.3

Product - Energetic Analysis

- Radiant product

Response to 2.5

Response to 8 and 12

Response to 15.3

No response to 17.6

- Regenerating product

Response to 2.5

Response to 8 and 12

Response to 15.3 and 17.6

- Perfect Balance product

Response to 2.5, 8, 12

Response to 15.3 and 17.6

Response to 1.1

Human Energy Fields

VIBRATORY FIELD

This reflects the power of cellular energy as the result of the revitalization of the cellular system, by means of:

- regeneration of the declining cells
- elimination of death cells

The vibratory field radiates around the body ranging from a few meters to infinity

It is measured with Lecher instrument at 2.5

Human Energy Fields

CENTRIPETAL ENERGY FIELD

Called also convergent Yin energy field

It reflects our capacity to constitute our centripetal (inward) energy resources in order to best manage our material body

As no radiation is emitted towards the outside of the body, *no other instruments or biological analysis can identify the blockages in the deep energy system of the body*

It is measured with the Lecher instrument at 5.7

Human Energy Fields

CENTRIFUGAL ENERGY FIELD

Called also the symptomatic Yang energy field

It manages the body's cellular system and provides energy for the rejuvenation of declining cells in order to reverse entropy

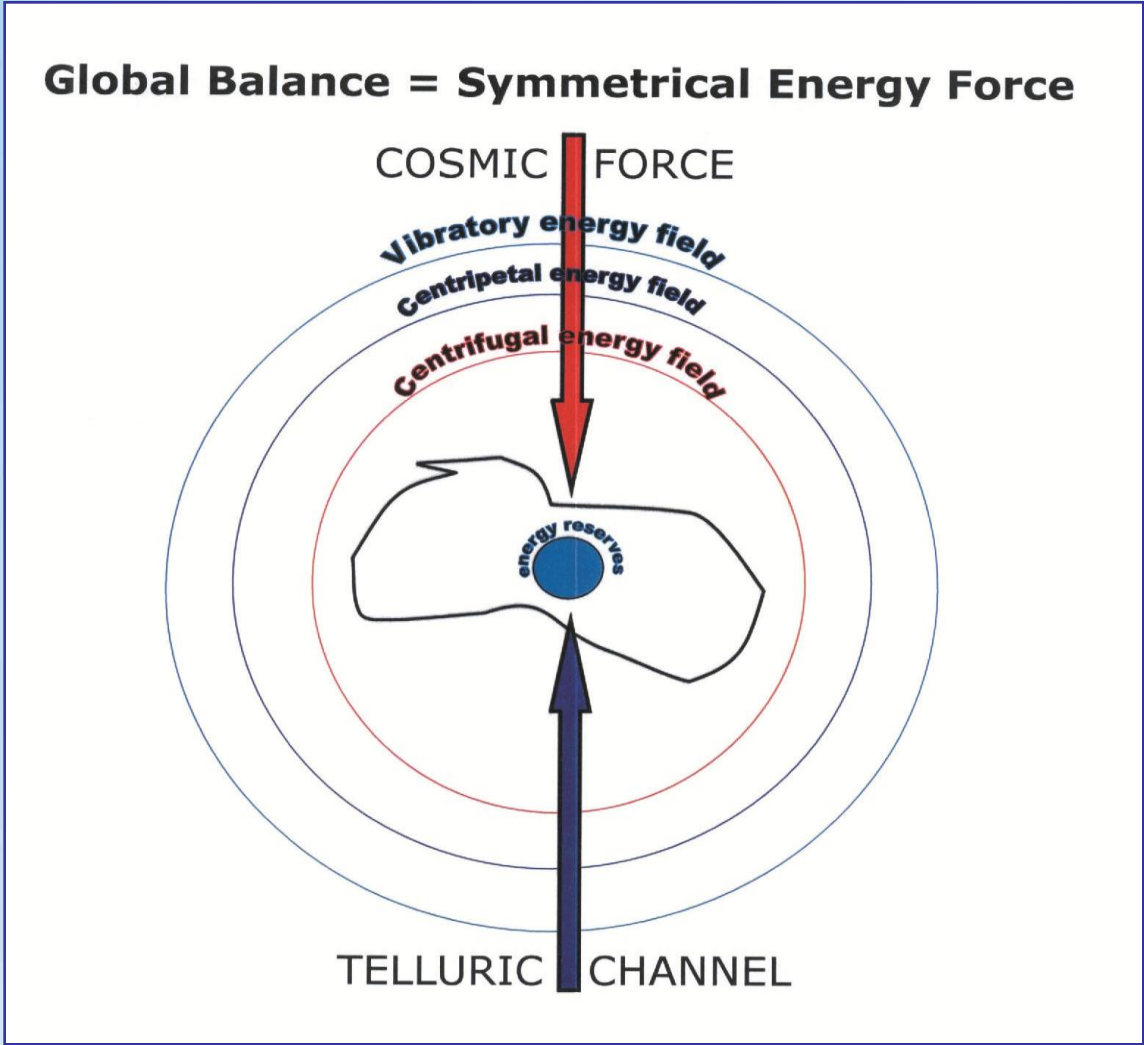

Many other energetic techniques can be used to identify quality of this field as an external analysis and detection devices

This field is measured by Lecher instrument at 7.8

Human Energy Fields
