History of Spagyric Medicine

The Medicines of Paracelsus

Paracelsus first introduced the word Spagyric in his writing, "*Opus Paranirum*". He advises doctors to "study spagyric, for this reason: to learn to differentiate between what is correct and what is false".

"The third foundation upon which medicine rests is alchemy [spagyrics]. If the physician does not have good ability and experience in this, his art is in vain."

*-Paracelsus (1493-1541)
European Renaissance Physician*

What are Soluna Remedies?

Complex Natural Remedies Spagyrically Prepared and Homeopathically Potentized

Soluna spagyric remedies are comprised of numerous ingredients – medicinal plants + herbs as well as metallic and mineral elements

- Connections have been found between the function of certain metals and the regulation mechanisms of specific organ systems

The key biotherapeutic ingredients undergo complicated purifications to refine them to the highest levels of potentization, *making them much more effective than regular homeopathic medicines.*

Why Soluna Remedies?

Superior Ingredients – *Quality Matters*

The medicinal plants employed today in wholesale commerce satisfy the requirements placed by pharmaceutical concerns with respect to the quantities of individual constituents. They do not, however, conform to the expectations of quality, oriented as they are to signatures (including form, consistency, color, fragrance and taste)

Why Soluna Remedies?

Tradition – *Over 90 years of excellence*

Centuries of knowledge, research and understanding go into each Soluna remedy. Created in 1921 and researched and developed over a 40 years period, Soluna remedies have over 90 years of positive clinical experience.

Nature and experience dictates the healing power of the remedies

- Intricate production process insures quality is not lost at any stage, yet rather enhanced
- Marriage of tradition and quality is what distinguishes the Soluna remedies from other medicines that cannot duplicate this unique combination

The Soluna Difference

Soluna remedies *combine the advantages* of **phytotherapy** (herbal medicine) with those of classical **homeopathy**: their physical active ingredients strengthen the body and their mental and spiritual principles (or spagyrically enhanced homeopathic active ingredients) strengthen the mind and consciousness!

Soluna remedies are specialized combination homeopathic preparations made of *medicinal herbs, metals and minerals*. Experience has shown that their scope of application is therefore both deep and extensive.

The Soluna Difference

Soluna remedies are made from ingredients which are cultivated and harvested by hand in the *Soluna Medicinal Gardens*, ensuring the highest quality possible: the medicinal herbs are from unpolluted gardens in the Italian Alps and the healing properties of the metals and minerals are “*opened*” in the Soluna laboratory in Donauworth, Germany.

Soluna remedies are created in a unique homeopathic potentiating cycle: since 1921 they have been potentiated homeopathically with every batch cycle and are thus “*more*” *than the sum of their ingredients*.

The Soluna Difference

- **Soluna remedies** correspond to all the secrets of astrological homeopathy according to the famous physician and alchemist **Paracelsus**. Much later in time, *Hahnemann developed classical homeopathy on this basis.*
- **Soluna remedies** are produced in *highly complex and protracted processes* involving careful manual labor in small-volume glass vessels, and in rooms designed on geomantic principles – straight from nature to the laboratory and to the hands of practitioners for effective use with patients.
- **Soluna remedies** work on all levels of the human being and in a deep and significant way. ***These wonderful remedies truly affect the body, mind and spirit!***
